

ABT-Series

Trapdoor Electriscreen

A LARGE-SCALE TRAPDOOR OPTION

The ABT Trapdoor was designed for large-scale applications in which the screen must disappear completely when not in use. The ABT-Series consists of two models, ABT-4 and ABT-6 to accommodate various size requests.

MAXIMIZING PERFORMANCE

The ABT Trapdoor is available with any of Stewart's front or rear materials. Our exclusive Tab-Guy™ tensioning system ensures a smooth and completely flat screen surface. A matte-black painted border, including 12" of black-drop (unless otherwise specified) provides a perfectly masked image area while absorbing any potential over-scan.

THE STEWART DIFFERENCE

Stewart Filmscreen is synonymous for superior quality, custom craftsmanship and excellent customer service. Since every Stewart product is handcrafted, custom sizes and configurations are easily accommodated.

- » For use in large venue applications
- » Trapdoor hides screen when not in use
- » 4" Access panel for easy maintenance
- » Available in front or rear models
- » Exclusive Tab-Guy™ tension system
- » Standard 12" painted black-drop
- » Includes low voltage control (LVC)

A screen is the centerpiece of your projection environment. Invest in quality craftsmanship and your screen will last you through a lifetime of technology. Contact the Stewart representative in your area today for more information on how to get a Stewart Filmscreen made especially for you!
